Industrial Design Cumulus Working Group Proposal

Massimo Imparato, Mariia Zolotova

Participatory Data Generation and Visualization with KUMU platform

Make sense of your messy world!

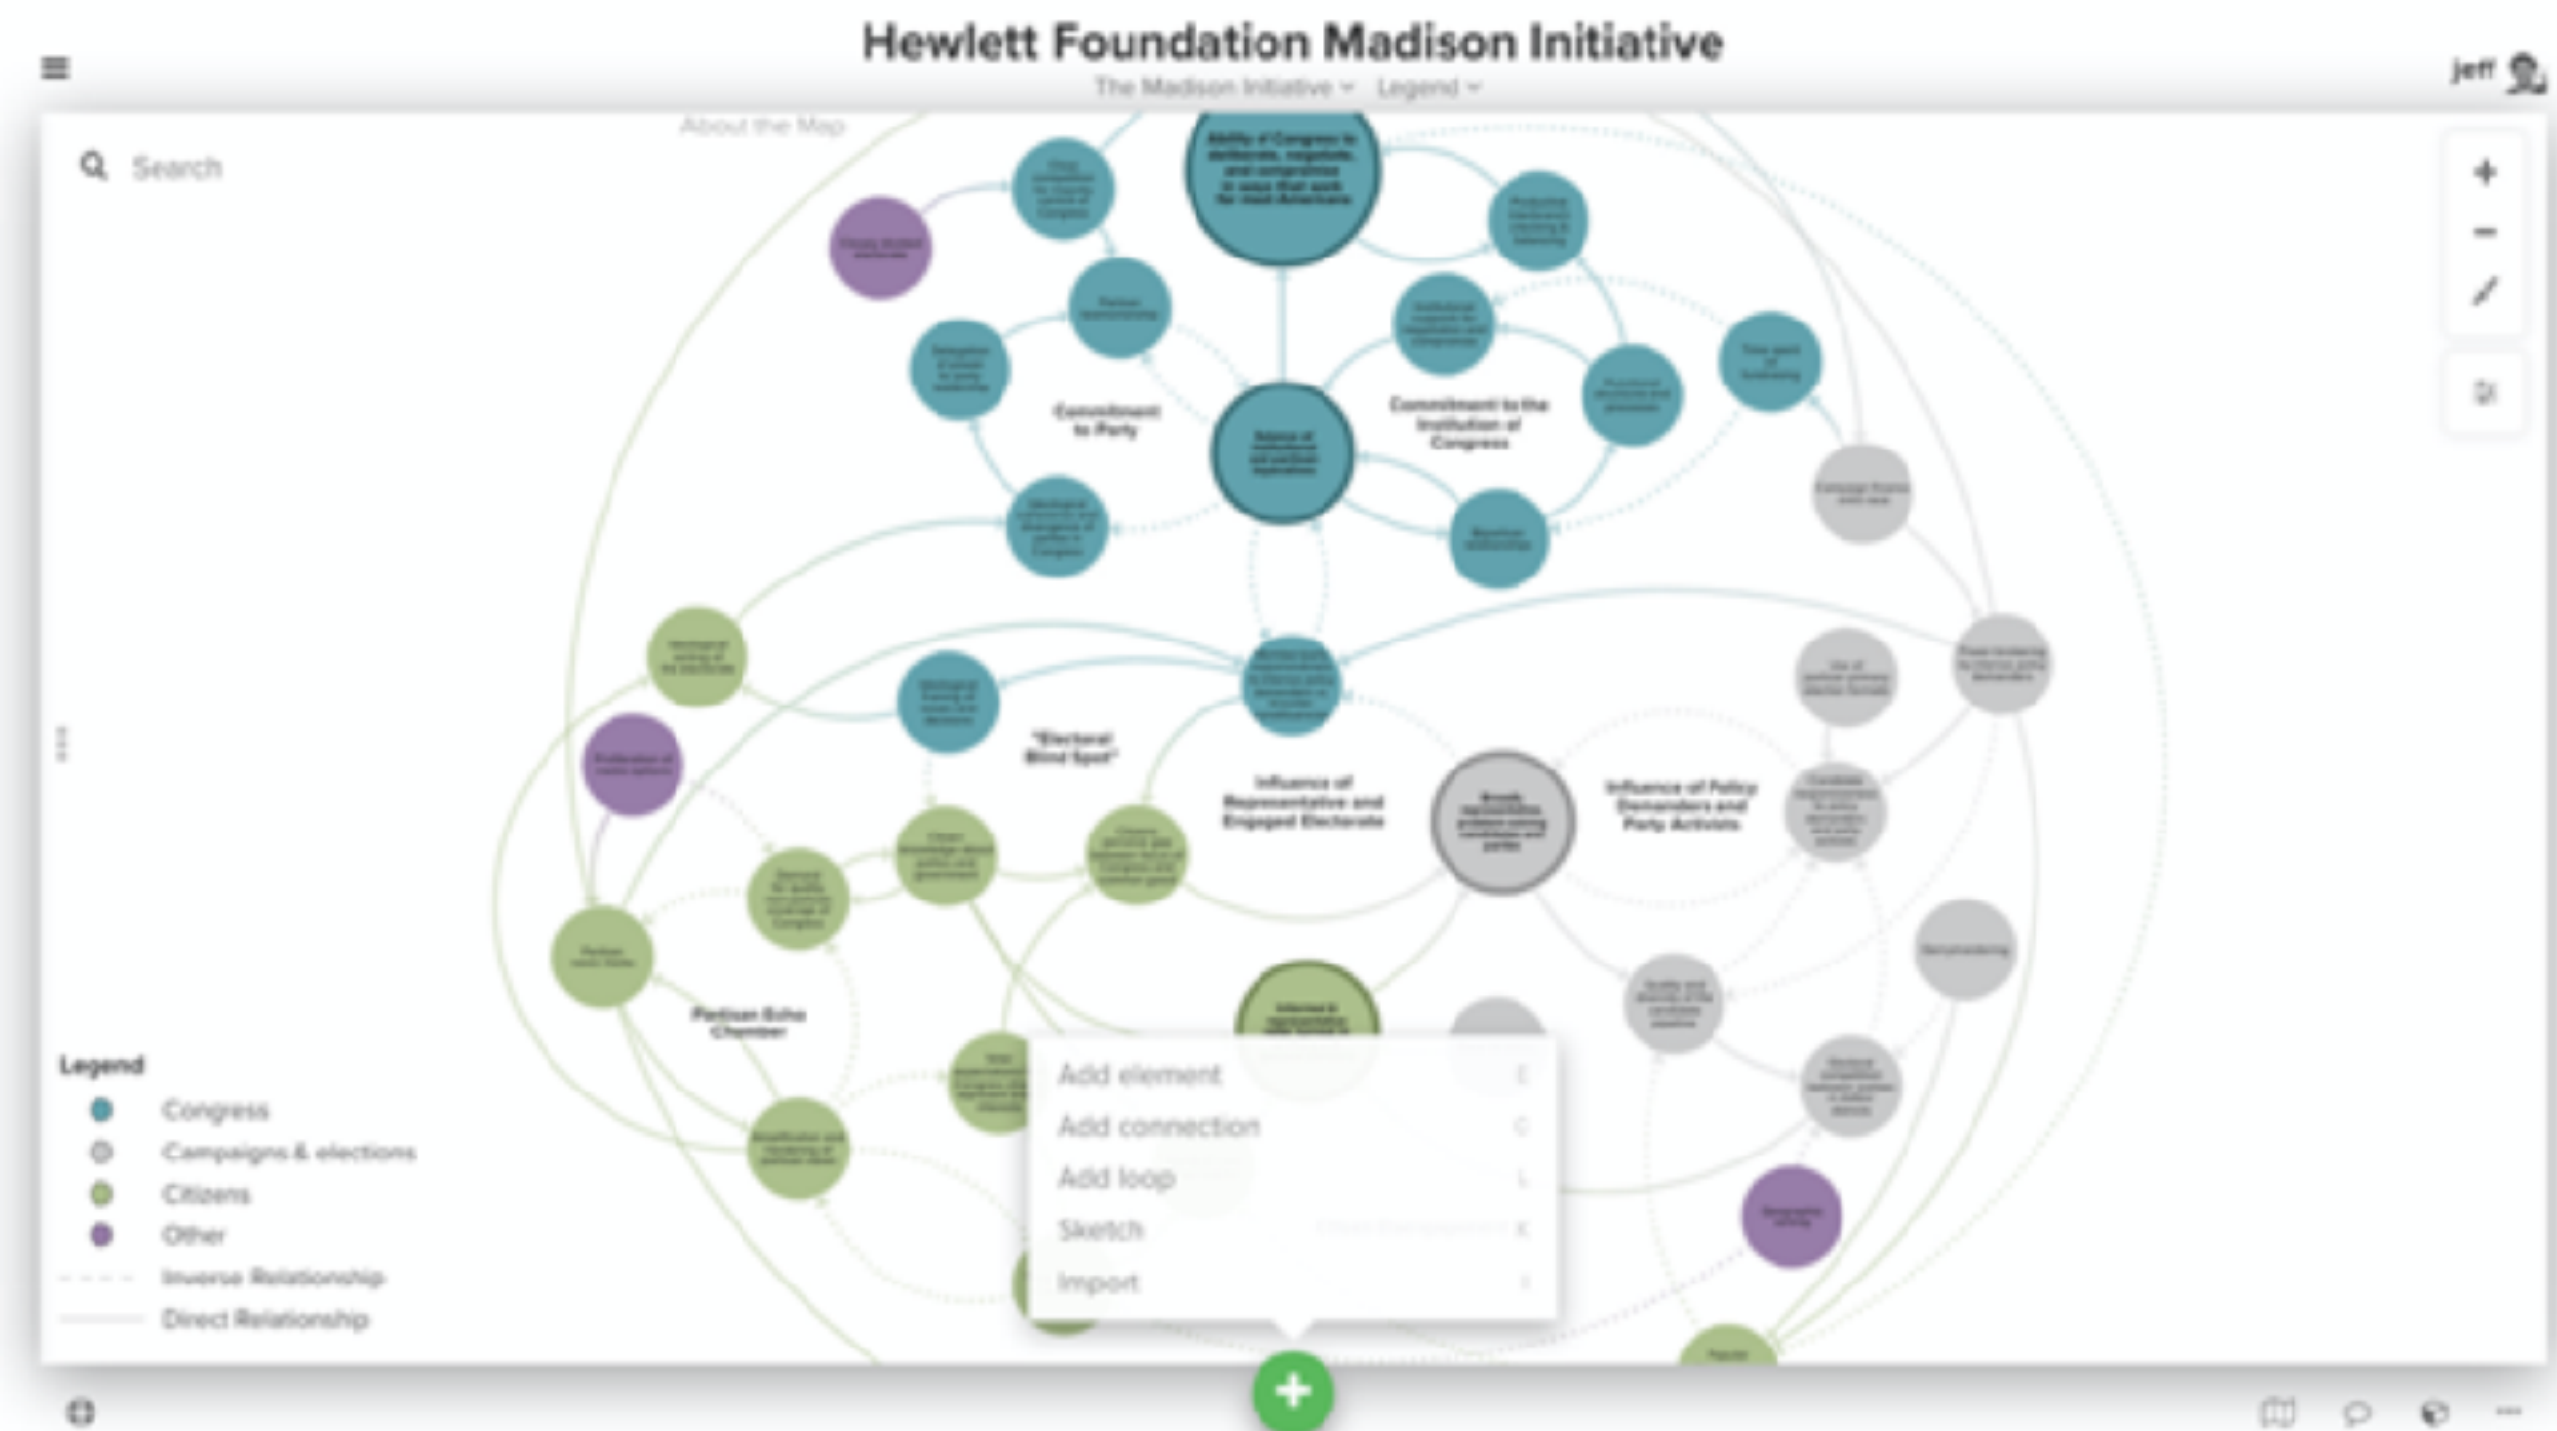

<https://kumu.io>

Participatory Data Generation and Visualization with KUMU platform: *maps based on data*

Create maps by hand, or import existing data.

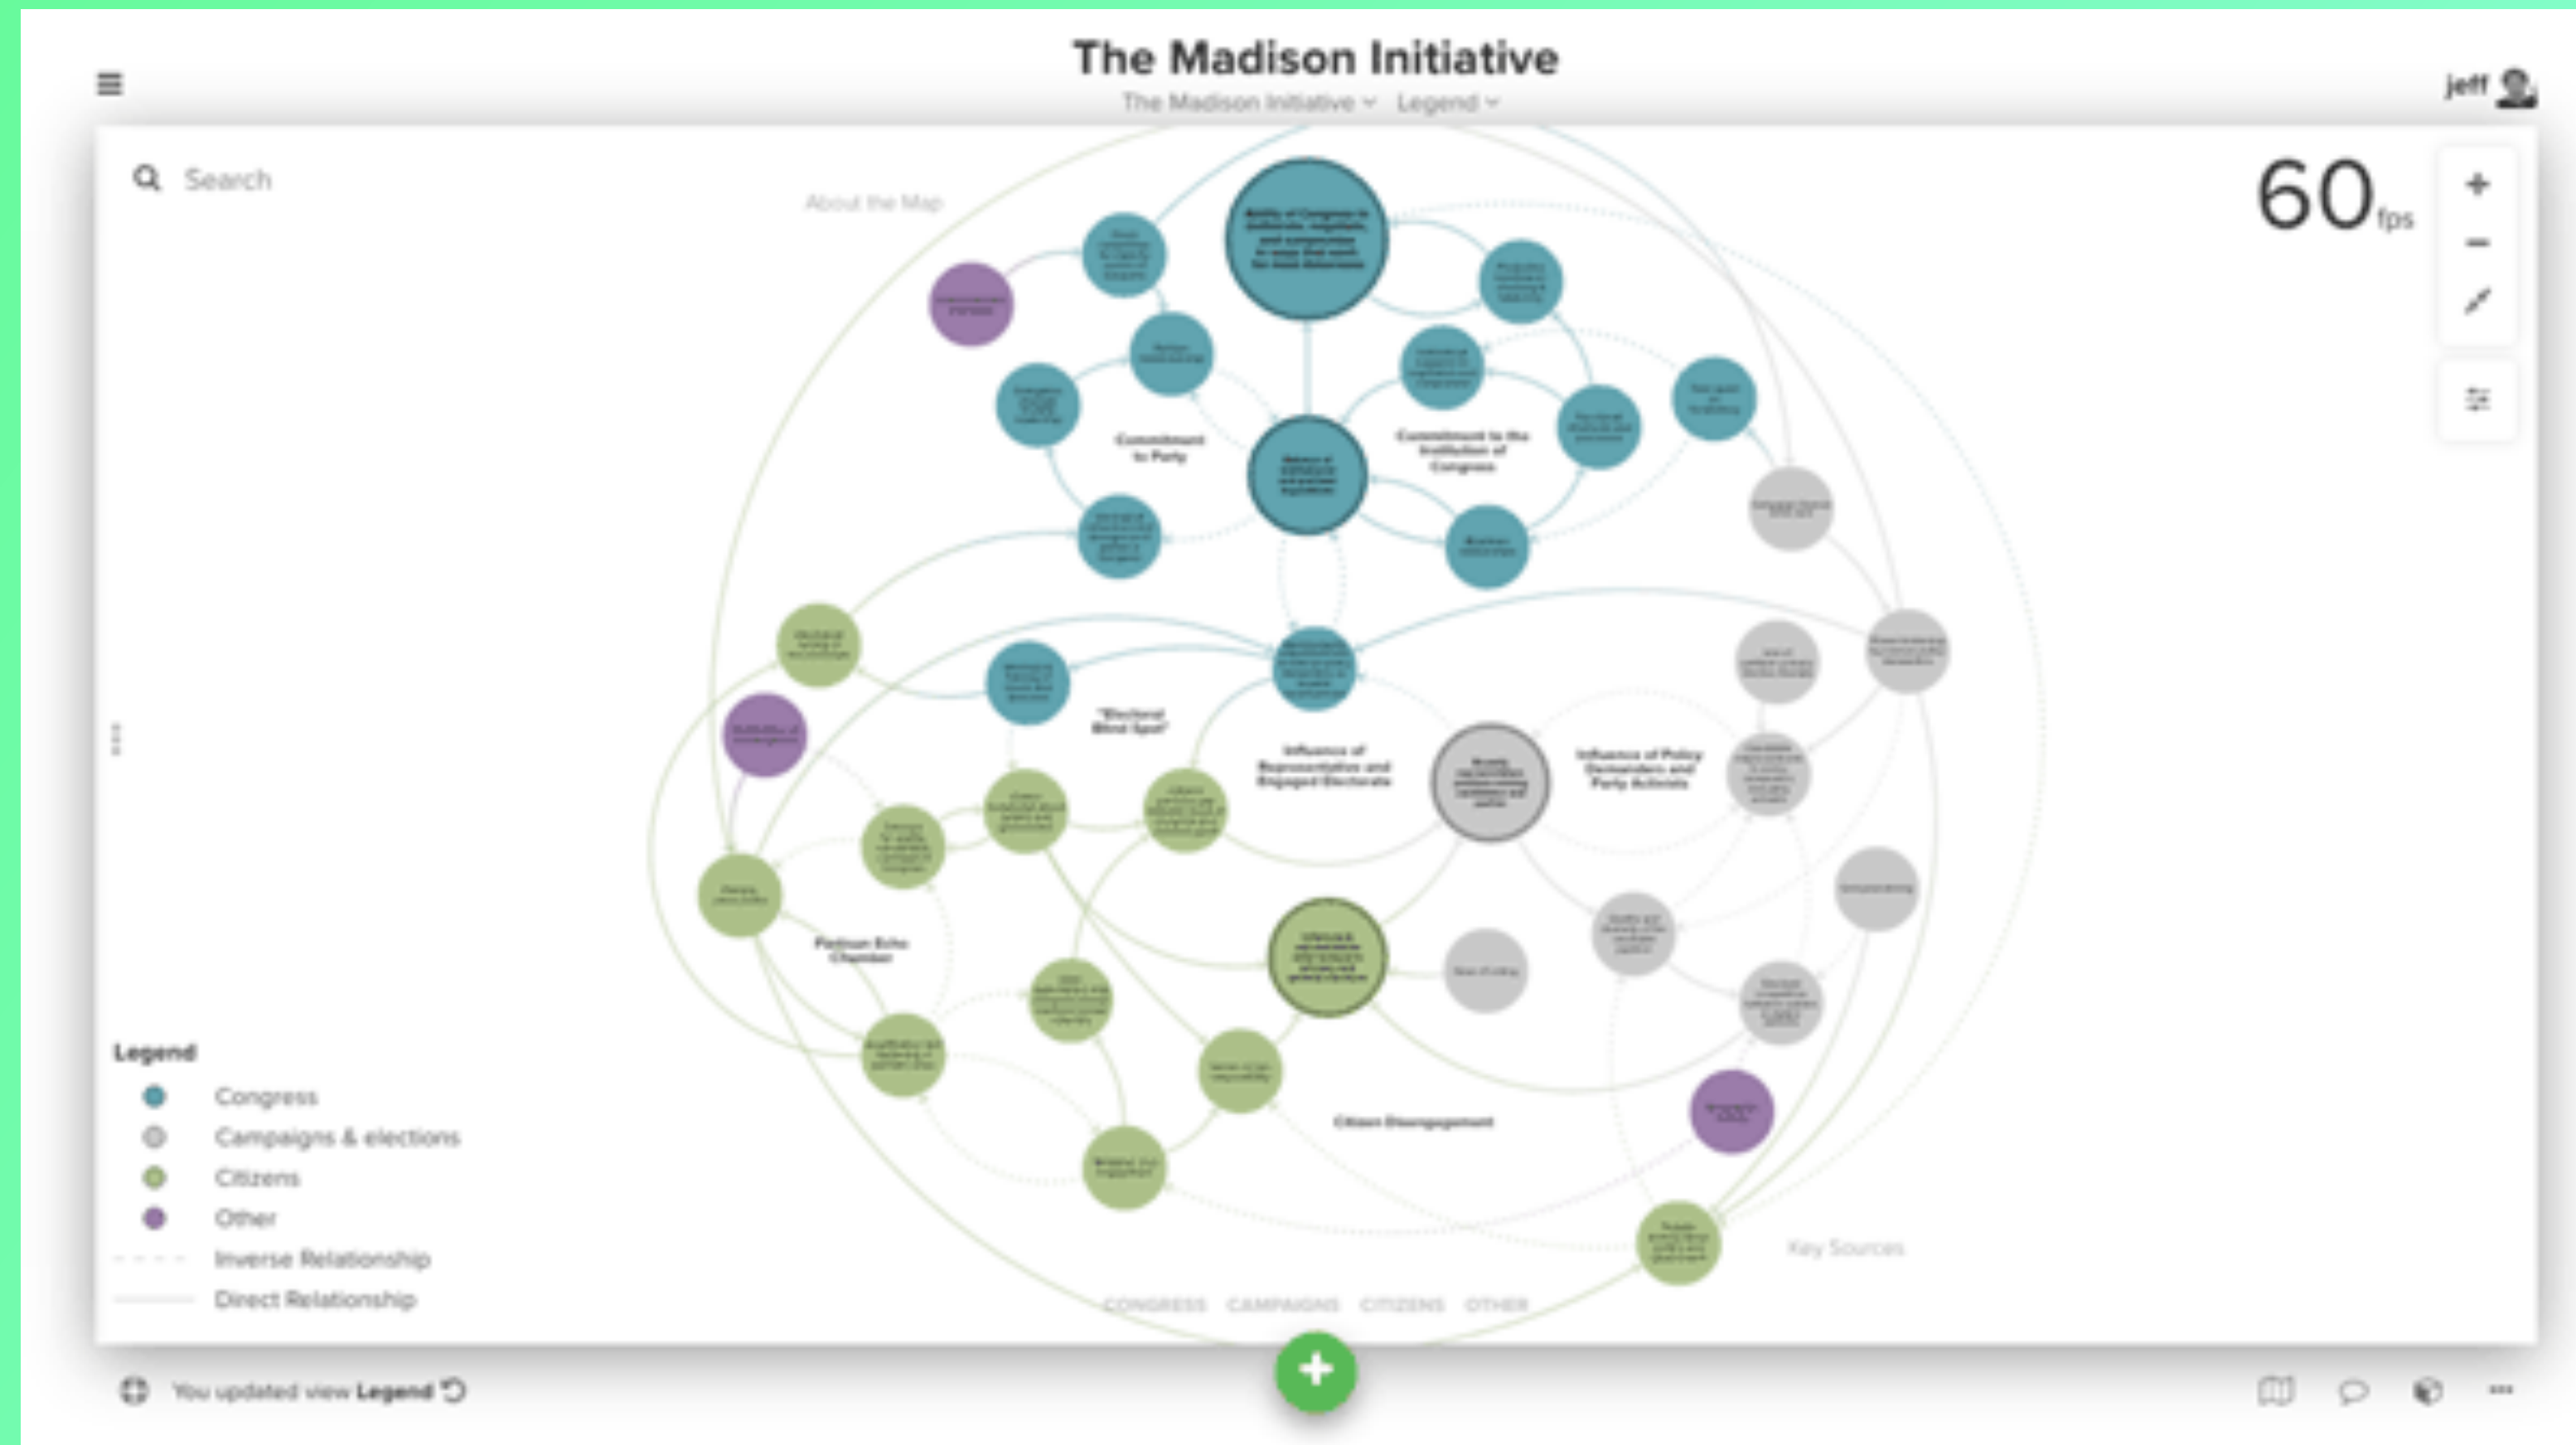

It's easy to learn the basics in just a few minutes — and free to get started! Start mapping in seconds with no downloads required.

Already have existing data? Our simple import format makes it easy to create a map from a spreadsheet. Import a local spreadsheet or use our Google Sheets integration to build maps from live data (or try [crowd-sourcing your map](#) by making your Google Sheet publicly editable).
